STATISTICAL REPORT

1970

FACULTY OF MEDICINE SIRIRAJ HOSPITAL

MAHIDOL UNIVERSITY

PREFACE

The classification of cancer in the Statistical Report of 1970 follows the code of WHO, The International Classification of Diseases, Injuries, and Causes of Death, 8 th. revision, 1965. According to this classification, there are some alternations in the age-group, code numbers, and sites of some malignant neoplasms. In this report, the table on Malignant Neoplasms in Childhood (Table VIII) is added for the pediatricians. I shall be very much appreciated if somebody would let me know what other informations you are interested and in what way this report will be more useful. The reliability of the statistics herein, require much effort and cooperation of the doctors and officers in charge of the statistical divisions in the departments concerned, including those in the Department of Pathology and Out Patient Department. I wholeheartedly thank to the above mentioned staffs, as well as those in the Tumour Registry, especially Mrs. Chuchit Suvongse and Dr. Visut Vootiprux whose tireless efforts make this report possible.

On this occasion, I would like to express my gratitude to Dr. Tongnong Nitayasudhi, of the Department of Surgery, who sacrifices himself for the sake of the completeness of this report, and I feel so sorry to learn that his hardload of work prevent him from doing the statistical work anymore.

R. SUVANASUTHI, M.D.

CHAIRMAN OF THE SUBCOMMITTEE
OF TUMOUR REGISTRY.

TABLE I
NUMBER OF PATIENTS

TYPE OF PATIENT	NO. OF CASES
Total No. of patients at O.P.D.	502,104
Total No. of new patients	169,987
Total No. of new malignancies	2,607

THE CANCER PATIENTS ARE ABOUT 1.53 % OF ALL NEW PATIENTS

TABLE II
DIAGNOSIS

DIAGNOSED BY	NUMBER	PERCENTAGE
Histological proof	2,296	88.1
Clinical and X-ray	311	11.9
TOTAL	2,607	100

TABLE III
NUMBER OF MALIGNANT NEOPLASMS BY AGE AND SEX

AGE-GROUP	NO. OF CASES			%
