Introduction

Faculty of Medicine Siriraj Hospital, Mahidol University is a leading tertiary care university hospital of Thailand. It is the first western medical center in Thailand which founded in 1888. The hospital has 29 departments and 4 institutes which perform general clinical services, medical educations and researches. We have 2,372,001 hospital-visits and 479,989 new patients in the year 2008. Siriraj Cancer Center is a department which is responsible for collaborative functions in cancer care and cancer registry. This "Siriraj cancer registry 2008" is an official report of hospital-based cancer incidence from Siriraj hospital. It is the 40th annual cancer statistics which has been regularly published since 1969.

Data processing of cancer registry was performed by collecting of in and out patients from ICD coding system and rechecked with Siriraj cancer registry database to identified new cases, then validated with medical records, pathological reports and finally proved by medical consultants. Due to the re-organize of registry processes in Siriraj Cancer Center to improve work flow efficiency, we made some changes in this annual report as following:

1. Changed the name of the report from "Statistical reports XXXX" to "Siriraj cancer registry XXXX".
2. Used ICD-O coding system for cancer instead of ICD-10 which was used previously. This change would effect some cancers especially in hematologic diseases (C42) and lymphoma (C77). However, the tracking of cancer can be made by using morphologic code (M).
3. We created more specific tables of lymphoma separated as nodal and extra-nodal diseases.
4. The cancer incidence was calculated from ratio of new cancer patients compared to total number of patients in the same year. Actually, you may recognize the change of percentage of cancer since, in the past, we calculated the cancer incidence from ratio of new cancer patients compared to new hospital number (HN) which does not represent the real new patients cases.

I would like to acknowledge the kindly supports from The Medical Record Services, Medical Information Technology Services, Departments of Pathology, Radiology, Obstetrics and Gynecology, Surgery, Medicine, Orthopedics, Oto-rhino-laryngology, Ophthalmology and Pediatrics, as well as Siriraj Cancer Center organizing committees and all staffs in Siriraj Cancer Center who worked hard to make this Siriraj cancer registry 2008 complete and valid.

Associate Professor Adune Ratanawichitrasin, MD.
