Introduction

Faculty of Medicine, Siriraj Hospital, Mahidoluniversity is the first medical school in Thailand which found was in 1888. In the year 2012, we served 2,799,123 hospital visits from 548,781 new patients which included 6,932 new cancer patients. Siriraj Cancer Center is a center which is responsible for collaborative functions in cancer care, cancer research and cancer registry. **This “Siriraj Cancer Registry 2012” is the 44th** annual official report of hospital based cancer registration of Siriraj hospital, since 1969. Data processing was performed by collecting and verification from medical records, pathological reports and image findings, finally proven by ICD-O coders with medical consultants. With computerized register-program helped to improve the work flow, efficiently.

There were some cancer patients who were treated in SirirajPiyamaharajkarun Hospital, that we had not included in the main report, but preliminary showed as a upplement.

I would like to acknowledge the kindly support from the Medical Record Service, Medical Information Technology Service, Department of Pathology, Clinical Pathology, Microbiology, Immunology, Radiology, Surgery, Medicine, Orthopedic Surgery, Ophthalmology, Oto-rhino-laryngology, Pediatrics, Obstetrics and Gynecology, for data and medical records, as well as Siriraj Cancer Center organizing committees and all staffs in Siriraj Cancer Center who worked together as a team. And I hope, this report will be useful in improving our cancer patient management.
