INTRODUCTION

Established in 1945, the Siriraj Cancer Organization, later transformed to Siriraj Cancer Center, has made a journey to the 75th anniversary. During many decade-long odyssey, our organization has experienced tremendous changes from time to time. To collaborate multidisciplinary cancer care for the Faculty of Medicine Siriraj Hospital during the crisis from COVID-19 pandemic, staffs of Siriraj Cancer Center have faced with unexpected difficulties. However, with the solidarity of everyone in the faculty, cancer services have been carried on, eventhough both patients and healthcare providers remained in unusual situation. The cancer registry shown in this report may be the evidence of COVID-19 effect that burden our cancer services in Siriraj Hospital. To release the information regarding clinical data of patients with cancers, this year the 52nd Annual Report of Siriraj Hospital-based Cancer Registration was rather late behind the schedule. The “Siriraj Cancer Registration 2020” Annual Report was the result of intensive analysis from our coders and IT team. Without the teamwork and support from our medical consultants amidst COVID-19 pandemic, this report would not be possible. In the year 2020, we still served 2,669,658 out-patient visits. Among those patients, 509,191 visits were new patients, including 5,981 new visits of patients with cancer who were treated in the Faculty of Medicine Siriraj Hospital.

I would like to thank the kind support from the Medical Record Service, Medical Information Technology Service, Department of Pathology, Clinical Pathology, Microbiology, Immunology, Radiology, Surgery, Medicine, Orthopedic Surgery, Ophthalmology, Oto-rhino- laryngology, Pediatrics, Obstetrics and Gynecology, for continuously providing the constructive data. I would like to thank members of the Siriraj Cancer Center Organization Committee and all staffs in Siriraj Cancer Center who worked tremendously hard during such a difficult situation. It would be very grateful if the information in this report could be used for improving the quality of service as well as the quality of life for patients with cancer.
